

GuanoFix Plus is a biocide which is used to kill disease related bacteria, viruses, spores and protozoa associated with birds and avian environments. This concentrated disinfectant should be used in areas of bird activity to prevent transmittable bird diseases such as Avian Influenza and Zoonoses associated with birds such as avian tuberculosis, erysipelas, ornithosis, psittacosis, cryptococcosis, histoplasmosis, salmonellosis, cryptosporidiosis, campylobacteriosis, and escherichiosis.

GuanoFix Plus, once diluted, can be sprayed or wiped onto surfaces.

General Use:

A 1:60 dilution ratio. i.e: Add 10ml of GuanoFix Plus to 600ml of clean water.

- To disinfect surfaces directly in which there is bird activity, such as roosts, nests, landing areas.
- To pre treat bird droppings and treat surfaces post guano removal
- To disinfect tools, equipment and PPE

Heavy Soiling:

A 1:15 dilution ratio. i.e: Add 40ml of GuanoFix Plus to 600ml of clean water.

- To disinfect areas with heavy guano soiling
- To treat collected avian materials including nests, carcasses and debris.

It is recommended to treat surfaces before removing guano, saturating debris will help to prevent hazardous particles as well as disinfecting. Any carcasses, nests or collected debris should be treated before placing into disposal bags. All surfaces that have been cleared of guano and avian materials should have a final application of GuanoFix Plus at 1:50 dilution.

GuanoFix Plus is a multi-surface biocide, it can also be used as a disinfectant in stables, kennels, animal transport, areas of rodent activity or other pest activity. It is recommended to complete a test on sensitive surfaces before a full application.

Contains: benzyl (C12 - C16) alkyl dimethyl, chlorides, N-(3-aminopropyl)-N-dodecylpropane-1,3-diamine, Didecyltrimethylammonium Chloride, Chlorhexidine Gluconate

USE BIOCIDES SAFELY.

ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.

HAZARD CLASSIFICATION

Harmful if swallowed.

May cause damage to organs through prolonged or repeated exposure.

Causes severe skin burns and eye damage.

May be fatal if swallowed and enters airways.

Very toxic to aquatic life with long lasting effects.

PRECAUTIONS

Keep out of reach of children.

Do not breathe dust/fume/gas/mist/vapours/spray.

Wear protective gloves/protective clothing/eye protection/face protection.

Wash affected contact areas thoroughly after handling.

IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

Wash contaminated clothing before reuse.
