

Registration number –	Appearance – Red clear liquid with pleasant smell		
Describe the activity or work process. <i>(Inc. how long/ how often this is carried out and quantity substance used)</i>	<p>PESTCLEAN PLUS is a biocide which is used to kill disease related bacteria, viruses, spores and protozoa associated with birds and avian environments. This concentrated disinfectant should be used in areas of bird activity to prevent transmittable bird diseases such as Avian Influenza and Zoonoses associated with birds such as avian tuberculosis, erysipelas, ornithosis, psittacosis, cryptococcosis, histoplasmosis, salmonellosis, cryptosporidiosis, campylobacteriosis, and ehrlichiosis.</p> <p>Pest Clean, once diluted, can be sprayed or wiped onto surfaces.</p> <p>General Use: A 1:60 dilution ratio. i.e: Add 10ml of Pest Clean to 600ml of clean water. To disinfect surfaces directly in which there is pest activity, such as nests, light soiling, feeding areas or travel routes. To pre treat animal droppings and treat surfaces post faecal removal. To disinfect stables, kennels, coops and other vacated animal housing or transport vehicles. To disinfect tools, equipment and PPE</p> <p>Heavy Soiling: A 1:15 dilution ratio. ie: Add 40ml of Pest Clean to 600ml of clean water. To disinfect areas with heavy soiling. To treat collected pest materials including nests, bedding, carcasses and debris.</p> <p>It is recommended to treat surfaces before removing debris, saturating the material will help to prevent hazardous particles becoming airborne as well as disinfecting. Any carcasses, nests or collected debris should be treated before placing into disposal bags. All surfaces that have been cleared should have a final application of Pest Clean at 1:50 dilution. It is recommended to complete a test on sensitive surfaces before a full application.</p>		
Location of process being carried out?	PESTCLEAN PLUS is a multi-surface biocide, it can also be used as a disinfectant in stables, kennels, animal transport, areas of rodent activity or other pest activity. It is recommended to complete a test on sensitive surfaces before a full application.		
Identify the persons at risk:	Employees <input checked="" type="checkbox"/>	Sub-contractors <input type="checkbox"/>	Public <input checked="" type="checkbox"/>
Name the substance involved including active ingredient, in the process and its manufacturer.	<p>Contains: ALKYL DIMETHYL BENZYL AMMONIUM CHLORIDE; N-(3-AMINOPROPYL)-N-DODECYLPROPANE-1,3,DIAMINE; CHLORHEXIDINE DIGLUCONATE; PERFUME (CONTAINING CITRAL, CITRONELLOL, GERANIOL, LIMONENE, LINALOOL)</p> <p>LIQUID SCIENCE SOLUTIONS LIMITED</p>		

Classification (state the category of danger)

Workplace Exposure Limits (WELs) <i>please indicate n/a where not applicable</i>							
n/a				Short-term exposure level (15 mins): N/A			
State the Risks to Health from Identified Hazards							
EC Classification: H314: Causes severe skin burns and eye damage. H400: Very toxic to aquatic life. H411: Toxic to aquatic life with long lasting effects.							
Control Measures:							
Always read label / MSDS before use and comply with details. To be used by trained operative (professional) only P260: Do not breathe spray. P280: Wear protective gloves/protective clothing/eye protection/face protection. P301+P330+P331: IF SWALLOWED: Rinse mouth. Do NOT induce vomiting P303+P361+P353: IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water . P304+P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing. P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P315: Get immediate medical advice/attention. P363: Wash contaminated clothing before reuse							
Is health surveillance or monitoring required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>

First Aid Measures							
Inhalation: IF INHALED: Remove casualty from exposure ensuring one's own safety whilst doing so. If unconscious and breathing is OK, place in the recovery position. If conscious, ensure the casualty sits or lies down. If breathing becomes bubbly, have the casualty sit and provide oxygen if available. Transfer to hospital as soon as possible.							
Skin: IF ON SKIN (or hair): Remove all contaminated clothes and footwear immediately unless stuck to skin. Drench the affected skin with running water for 10 minutes or longer if substance is still on skin. Transfer to hospital if there are burns or symptoms of poisoning.							
Eyes: IF IN EYES: Bathe the eye with running water for 15 minutes. Transfer to hospital for specialist examination.							
Ingestion: Wash out mouth with water. Do not induce vomiting. Give 1 cup of water to drink every 10 minutes. If unconscious, check for breathing and apply artificial respiration if necessary. If unconscious and breathing is OK, place in the recovery position. Transfer to hospital as soon as possible.							

Storage / Spillage		
<p>Storage: - Avoid contact with acids and alkalis - Keep away from heat and sources of ignition - Store in a well-ventilated place. Keep cool. - Keep only in the original container in a cool, well-ventilated place away from oxidising substances - Forms hazardous decomposition products - Store locked up.</p> <p>Spillage – - Avoid release to the environment. - Use appropriate containment to avoid environmental contamination - Do not allow to enter public sewers and watercourses - If contamination of drainage systems or water courses is unavoidable, immediately inform appropriate authorities - Ensure adequate ventilation. Absorb liquid components with liquid binding material (sand, diatomite, acid binders, universal binders, sawdust). - Absorb spillage in inert material and shovel up - Collect spillage. - Place in appropriate container</p>		
Disposal of Substances & Contaminated Containers
