

Registration number – GB-2020-1257

Appearance – 20 g pale-green soft block bait

Describe the activity or work process.
(Inc. how long/ how often this is carried out and quantity substance used)

Selontra® is an innovative rodenticide bait that offers several unique advantages for professional users. The product contains the active substance cholecalciferol which has a different mode of action to the predominantly used anticoagulant rodenticides

The number of bait points used depends on the pest pressure at the site where the product is to be used:

Mice: 20 - 40 g (1 or 2 units) of bait every 1-2 metres.

Rats: 100 - 140 g (5-7 units) of bait every 5-10 metres.

Wood/Field mice: 40 g (2 units) of bait every 1-2 metres.

Use the higher bait point density and the maximum number of bait units wherever rats or mice have been seen.

Be aware of under-baiting – follow the label recommendations for the quantity of bait per bait-point and the frequency of bait-points. Use the lower density of bait points in light infestations or in permanent baiting.

Location of process being carried out?

For use, in and around buildings in bait stations, covered and protected baiting points. Inspect 1-2 days after initial application then every 7 days for max 35 days **UNLESS TO BE USED AS PERMANENT BAITING UNDER CRRU** (checked at **minimum** every 4 weeks)

Identify the persons at risk:

Employees

Sub-contractors

Public

Name the substance involved including active ingredient, in the process and its manufacturer.

Selontra (BASF)

Active Ingredients – Cholecalciferol: 0.077 % w/w (0.075 % w/w pure)

State the Risks to Health from Identified Hazards

EC Classification: None. Cholecalciferol: This substance is not considered to be persistent, bioaccumulative and toxic (PBT). This substance is not considered to be very persistent and very bioaccumulative (vPvB).

Control Measures:

Non-Toxic and least toxic options to be considered before use
 Always read label before use and comply with details.
 To be used only by trained operative (professional)
 Keep in original, labelled container.
 Remain in control of substance at all times. Storage to be restricted to certified store, out of storage use to be confined to regulated vehicle.
 Place substance in manner to prevent access by non-target species including pets. Within Tamper resistant bait box, or covered station.
 Records to be kept on usage and location in pest control master file.
 Operator to wear suitable PPE when handling. Including gloves. Records of PPE maintenance to be held
 Waste product to be retained and disposed of by Pest Control operator as per EA guidelines.

Safety Phrases:

P101 If medical advice is needed, have product container or label at hand.
 P102 Keep out of reach of children.
 P103 Read carefully and follow all instructions.

Is health surveillance or monitoring required? Yes No

Personal Protective Equipment (state type and standard)

 <input type="checkbox"/>	:	 <input type="checkbox"/>	
Respirator		Goggles	
 <input checked="" type="checkbox"/>	Disposable gloves	 <input type="checkbox"/>	
Gloves		Overalls	
 <input checked="" type="checkbox"/>	Steel toe cap boots to be worn as per company dress code.	 <input type="checkbox"/>	
Footwear		Other	

First Aid Measures

Inhalation: Unlikely, keep patient calm, remove to fresh air
Skin: Wash thoroughly with soap and water
Eyes: Wash affected eyes for at least 15 minutes under running water with eyelids held open.
Ingestion: Rinse mouth and then drink 200-300 ml of water.

Storage / Spillage

Storage: Segregate from foods and animal feeds. Odour-sensitive: Segregate from products releasing odours. Further information on storage conditions: Keep only in the original container in a cool, well-ventilated place. Keep container dry. Keep away from heat. Protect from direct sunlight. Protect against moisture.
Spillage – Clean spillages immediately. Avoid entry to watercourses

Disposal of Substances & Contaminated Containers

Hazardous Waste Skip Return to Depot Return to Supplier Other
